

## Road Haulage - Maximum cargo weights

In the UK and most of Europe, the total gross weight (vehicle, Chassis, Container, Genset and cargo combined) for road haulage must not exceed 44000kgs (97000lbs). Based on general equipment weight combinations, we would recommend maximum weights as below. Please check in all instances with us for confirmation.

<b><i>Max Weight guide by Road</i></b>	<b>Kilos</b>	<b>Pounds</b>
<b>Non Heavy plated 20' containers</b>	21700	47840
<b>Heavy plated 20' containers</b>	27000	59524
<b>40' containers</b>	26000	57320
